

Keeping You Informed

Union Promises

Unions like to make a lot of promises about topics like pay, staffing, schedules, and benefits when they are trying to get your support and signature on a union authorization card.

The truth is the union doesn't have a magic wand or a top hat they can reach into that is full of fixes for the challenges we face together each day.

If you have issues or concerns,

you can always use your voice and share with leaders. We can work together to achieve things for our teams, our patients, and the communities we serve.
